# GSA MEMBERS FOR ... **VASIK.APS.** Denmark

From the outset in 2012, it has been our mission to differentiate ourselves from our competitors clearly. We have achieved this by paying close attention to our cost effectiveness, range of services offered, service delivery and by capitalising on the wealth of guarding experience within the organization.

Both large and small organisations have chosen us as their security partner because they know that we take our responsibilities and service agreements very seriously indeed. They value the fact that our services and expertise is always of the highest quality in order to meet our own exacting standards – whether that's within personal security, fire safety, reception security, guarding or consulting. It is true to say that our clients appoint us as their security partner for many different reasons in addition to the services and value for money we provide.

Crucially, we put 'Quality' at the core of everything we do, with the result that we quickly built up an enviable reputation as a professional supplier of security and safety services. One objective measure of the appeal of this philosophy is the fact that we recorded a profit from our very first year and have done so every year since. It is our plan to continue to build on our proven approach to meeting and then exceeding our client's requirements. We are proud to hold ISO 9001:2008 certification for Security Services and Personal Protection Services. Certificate number DIC419QMS. To learn more about us and our range of services visit [www.vasik.dk](http://www.vasik.dk)
